RG104 E-1 Box 140 Jun-Jul 1886

Mint of the United States at Philadelphia,
MELTING AND REFINING DEPARTMENT,

Philadelphia, 15 June ——, 1886.

Hon D. M. Fox, Superintendent

Sir,

The stack of flues for our gold melting having received double use, or even more, compared to any other, is in imminent danger of giving way in the midst of active work, and must be repaired at all hazards, the moment we cease melting, beginning of next week. Otherwise, if repaired in July, it will consume time, when we may be stuffed with demands for gold and Silver, and then we cannot possibly meet the demand by any means in our power.

Again, we have but enough crucibles remaining for a week's work, if that much, and need some forthwith, unless we stop work

Very respectfully yours

J. A. C. Booth
